

Marlow Explorer 62E

Quality, Versatility, Performance, Value

“With her 19’6” beam, the 62 has more internal volume than any other yacht under 70’. We were able to achieve this while keeping the draft under 5’ and keeping the loaded cruising speed above 20 knots.” - **David Marlow**

Why compromise when you can have everything you want? The Marlow 62 gives you better range at or above 8 knots than a slow trawler while providing the ability to cruise at 20+ knots for over 450 miles with far greater form stability. All this capability while still offering you the flexibility to build the layout that suits your cruising style and personal tastes. Our own state of the art factory and proprietary manufacturing techniques let us provide this at a lower cost than any yacht in our class.
